

List of studies to be monitored and proposed dates

No.	Name of study	Study PI	Proposed Monitor	Proposed Monitoring visit date
1.	The effect of a community based intervention on knowledge and uptake of family planning in fishing communities of Lake Victoria, Uganda	Dr. Annet Nanvubya	Miriam Akello	14 th -15 th Feb 2019
2.	Prevention of HIV Transmission by Improved Management of Recurrent Vulvovaginal Candidiasis: A Study on Vulvovaginal Candidiasis, associated Microbiome and Vaginal Self-Sampling for Metagenome Analysis	Dr. Gloria Omosa	Proscovia Nampijja	13 th -14 th Aug 2019
3.	Open label, dose escalation and age de-escalation for ChAdOx1 85A in Ugandan adults and adolescents, followed by a Phase IIa randomised, open-label trial among adolescents comparing ChAdOx1 85A prime followed by MVA85A boost versus BCG revaccination	Prof. Alison Elliott	Annet Nanvubya	22 nd -24 th Jul 2019
4.	Population differences in vaccine response: the role, reversibility and mediators of immunomodulation by chronic infections in the tropics (POPVAC)	Prof. Alison Elliott	Elizabeth Ayuo	15 th -17 th May 2019

5.	Maternal health improvement among fishing communities in Uganda through capacity strengthening of community health workers	Dr. Ali Ssetaala	Jacquelyn Nyange+ Harriet Nambozo	11 th -15 th March 2019
6.	Integrating the diagnosis and management of HIV-associated central nervous system (CNS) infections into routine health services in low and middle income countries (LMICS)	Dr. Sayoki Mfinanga	Miriam Akello	11 th -13 th Oct 2019
7.	Characterization of innate Natural Killer Cells in Early HIV infection	Dr Marianne Mureithi	Dr. Sarah Nanzigu+ Abidan Nambajimana	16 th -18 th Apr 2019
8.	Dynamics and Disease Burden of Zoonotic and Arboviral Infections in Kenya	Prof. Omu Anzala	Godfather Kimaro	Date TBD
9.	Translation of research into policy: Scaling up evidence-based multiple focus integrated intensified TB screening to end TB (EXIT -TB) in East African Region	Dr. Esther Ngadaya	Dr. Muzamil Mahdi	Date TBD
10.	A Phase IIa, 90-Day Safety, Adherence, and Acceptability Study of Intravaginal Rings Releasing Tenofovir with and without Levonorgestrel among Women in Western Kenya	Dr. V. Mudhune	Dr. Vincent Mutabazi	Date TBD

11.	An observational study to characterize immunity in the gastro-intestinal mucosal tissues and peripheral blood and how it relates to infection and diseases.	Prof. Omu Anzala	Bernadette Nayiga Kalanzi	Date TBD
